

SURENDER S

Flutter Developer | AI Product Engineer | Mobile Solutions Developer

Pondicherry, India | +91 9150411430 | | github.com/Surender1305 | linkedin.com/in/surender-s-364930283

Additional commercial and client projects available for demonstration upon request.

PROFESSIONAL SUMMARY

Flutter Developer with experience building ERP systems, asset management platforms, inspection workflow applications, and AI-assisted software solutions. Skilled in Flutter, Django, PostgreSQL, REST APIs, and AI-powered development workflows. Experienced in developing production-grade mobile applications, collaborating with international clients, and delivering scalable business solutions across education, asset tracking, and safety compliance domains.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Responsive UI Design, Mobile Architecture, REST API Integration, State Management (Provider, Riverpod, BLoC)

AI & Tools: AI Agents, Prompt Engineering, Agentic Workflows, AI-Driven Prototyping, Git & GitHub, Postman, VS Code

Backend & Database: Django, PostgreSQL, Firebase, Node.js, Express.js, SQLite

Additional: QR & Barcode Integration, PDF Report Generation, Role-Based Access Control, Push Notifications

PROFESSIONAL EXPERIENCE

Freelance Flutter Developer

Jan 2026 – Present

Remote | US-Based Client

- Collaborate directly with a US-based client to develop and maintain multiple mobile applications.
- Contribute simultaneously to three active Flutter applications with ongoing feature development.
- Participate in client discussions, requirement analysis, sprint planning, and delivery.
- Build scalable, user-friendly mobile solutions with modern architecture and API integrations.
- Developed and maintained proprietary client applications under private repository and NDA constraints.
- Utilized AI-driven development tools and agentic workflows to accelerate product delivery and prototyping.

Programming Staff Intern

2024 – 2025

Bright Tech, Puducherry

- Delivered programming instruction and hands-on training to students on core programming languages and development concepts.
- Prepared and conducted practical sessions, guided learners through coding exercises, and assessed programming proficiency.

KEY PROJECTS

College ERP System

Flutter | Django | PostgreSQL

- Developed a comprehensive ERP mobile application featuring attendance management, timetable scheduling, fee management, student portal, faculty management, and notifications.
- Designed role-based access control for Students, Faculty, and Administrators; currently in production testing with 100+ active users.

AssetGuard – Asset Management Platform

Flutter

- Built a rental-based asset management platform with QR/barcode scanning, asset assignment workflows, and maintenance tracking across 500+ assets through a centralized mobile platform.

Inspectra – Safety Inspection Platform

Flutter

- Developed Inspectra with 4 role-based workflows, digital inspections, PDF reporting, and compliance management for Inspectors, Safety Managers, Department Managers, and Administrators.

AI PPT Generator

Flutter | AI Integration

- Built an AI-powered presentation generation application with automated content generation and intelligent document creation features.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Pope John Paul II College of Education | CGPA: 8.7 / 10

Bachelor of Science in Computer Science

2021 – 2024

St. Joseph College of Arts and Science | Percentage: 74%

PROFESSIONAL HIGHLIGHTS

- Developed 4+ production-oriented Flutter applications.
- Collaborating with a US-based client across 3 active mobile application projects.
- Built an ERP system currently supporting 100+ active users during production testing.
- Designed a multi-role inspection platform supporting compliance and safety workflows.

CERTIFICATIONS

- Full Stack Web Development
- Python Programming
- Database Management Systems
- Git & GitHub Version Control
- Responsive Web Design
